

WAKE UP YOUR SLEEPING GIANT

75% of microbes found in soil are dormant.
Wake them up and improve crop yield with Phycoterra®.

Phycoterra®

VISIT OUR BOOTH AND ENTER TO WIN 80 ACRES (\$800 VALUE) OF PHYCOTERRA® PRODUCT.

What is PhycoTerra®?

PhycoTerra®, a superior soil microbial food, improves your field and crop yield by feeding and waking up the native microbes in your soil. The unique, sustainable formulation improves soil structure, nutrient availability, water productivity, and residue management across all soil types, crops and production systems – including no-till farms.

Features

Unique Mode of Action with proven on-farm results

Proprietary, Innovative Formulation

Activates soil microbes

Benefits

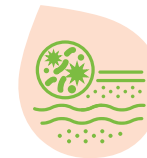

- Optimizes NPK availability
- Improves water holding capacity up to 10%
- Supports abiotic plant stress
- Improves soil aggregation

- Compatible with other crop inputs
- Flexible application: pre-plant, in-furrow, side dress, post-emergence & post-harvest
- Exceptional shelf-life, up to 2 years

- Improves yield & ROI
- Increases microbial activity by up to 33x
- Feeds beneficial native microbes with inert microalgae superfood

What does PhycoTerra® do?

IMPROVE
SOIL
QUALITY

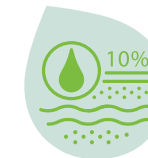

BOOST
CROP
YIELD & ROI

OPTIMIZE
NPK
AVAILABILITY

SUPPORT
RESIDUE
MANAGEMENT
AFTER HARVEST

IMPROVE
WATER HOLDING
CAPACITY,
BY UP TO 10%
